## WEEKLY WEATHER BULLETIN

For the Week Ended June 15, 1907.

Honolulu, T. H., June 17, 1907.

### GENERAL SUMMARY.

Very light rains occurred on Molokai, and Oahu, excepting at Manoa, and in the Hamakua, Kohala and Kau districts of Hawaii. No rainfall was reported from the Ewa district of Oahu, and the Kula, Waialua and Lahaina districts of Maui. In the remaining districts of Maui the amount of rainfall varied from 1.29 to 4.20 inches, and in the Puna, Kona and Hilo districts of Hawaii from 1.17 to 5.53 inches.

At stations having a record of ten or more years the total amount of rainfall for the week was from .14 to .27 inch below the average in the Hamakua and Kau districts of Hawaii, and from .09 to .25 inch below in the Puna and Kohala districts; and from 1.03 to 2.63 inches above in the Kona and Hilo districts. In the Koolau, Honolulu, Ewa and Waianae districts of Oahu the departures ranged from .09 to .35 inch below the average, while in the Koolauloa district they were slightly above. On Kauai the departures varied from .07 inch to 1.64 inches above.

The rainfall was less than that of the preceding week at all stations on Molokai, Kauai and Oahu, and in the Kula, Waialua and Lahaina districts of Maui, and the Kau and Kona and the west-central portion of the Kohala districts of Hawaii. The only stations where deficiencies exceeding 1.00 inch occurred were in the higher altitudes of the Honolulu district of Oahu, in the southern portion of the Puna district of Kauai, and in the Kau district of Hawaii, the greatest deficiency—2.51 inches—occurring in the last named district. In the Hamakua and Kona and the northern and eastern portions of the Kohala district of Hawaii the rainfall for the week was from .15 to .72 inch greater than during last week, while in the Hilo district it ranged from 2.20 to 4.73 inches greater. In the Hamakualoa district of Maui the rainfall for the week was .54 greater than that of the preceding one; .76 inch greater in the Hamakua district, and about 2.25 inches greater in the Koolau district.

The mean temperatures for the week were from 0.0 deg. to 2.0 deg. lower than those of the preceding one at all stations on Hawaii and Molokai, and in the Kona district of Kauai, the Ewa, Waianae and southern portion of the Koolauloa districts of Oahu, and the Waialua and Hamakualoa districts of Maui. In the Koolau district of Kauai they were from 1.2 deg. to 3.5 deg. lower, while they were from .1 deg. to 1.2 deg. higher in the Kula district of Maui, the Waianae and northern portion of the Koolau districts of Oahu, and the Koolau and Puna districts of Kauai.

Earthquakes were reported as follows from the Island of Hawaii: Pualoa—11th, two shocks, 20 minutes apart, the first one occurring at 3:40 a. m.; Laupahoehoe—11th, two shocks about 4:00 a. m.; Naalehu—11th, two heavy shocks during the early a. m.; Kealahou (Wallace)—11th, two light and one heavy shock between 4:00 a. m. and 5:00 a. m., and Kealahou (Davis)—11th, 1 shock at 4:10 a. m., lasting 3-4 seconds.

The following table shows the weekly averages of temperature and rainfall for the principal islands and for the group:

	Temperature.	Rainfall.
Hawaii.....	73.3 deg.	2.29 ins.
Maui.....	74.6 deg.	1.36 ins.
Oahu.....	76.6 deg.	0.33 ins.
Kauai.....	75.1 deg.	1.02 ins.
Molokai.....	74.7 deg.	0.23 ins.

Entire group.....74.6 deg. 1.52 ins.  
At the local office of the U. S. Weather Bureau in Honolulu generally, clear weather obtained, with measurable rainfall on two dates amounting to .03 inch.

inch, .21 below the normal, and .12 less than during last week. The maximum temperature was 83 deg., the minimum 71 deg., and the mean 77.4 deg., .5 deg. above the normal, and .2 deg. lower than during the preceding week. The mean relative humidity was 72.6 per cent and the prevailing wind direction NE, with an average hourly velocity of 8.0 miles.

### REMARKS BY CORRESPONDENTS.

[Note:—The figures following the name of a station indicate the date with which the week's report closed.]

#### ISLAND OF HAWAII.

Puuhoe Ranch (13)—The total rainfall for the week amounted to .22 inch, .15 less than during the preceding one.—S. P. Woods.

Puakea Ranch (13)—Rain occurred on five dates, giving a total of .31 inch, .33 more than during last week. High temperatures obtained.—A. Mason.

Kohala Mill (13)—Showers occurred daily and amounted to .78 inch, .21 above the average, and 15 more than last week's. The mean temperature was 74.6 deg.—T. Holtum Lillie.

Niuli (13)—The weather was calm and warm, with a mean temperature of 75.0 deg. Rains occurred on five dates and amounted to .92 inch, .28 above the average, and .52 more than last week's.—F. C. Paetow.

Paaahu (13)—The mean temperature was 76.1 deg., and the rainfall .41 inch, .41 more than during last week, and .14 less than the average.—Paaahu Sugar Plantation Co.

Paaulu (13)—The week was warm with a mean temperature of 72.2 deg., moderate E. winds, and rains in the late afternoon and at night amounting to .76 inch, .73 more than last week's.—C. R. Blacow.

SUNDAY GAMBLERS AT KAMEHAMEHA IV ROAD

Complaint is made that a gang of young men ranging from 18 to 23 years of age make a practice of gambling on the veranda of a vacant store building on the makai side of King street just beyond Kamehameha IV road. It is claimed that the gambling goes on there in full view of the public, within a few feet of a road and for hours at a time on Sundays. Urgings to these gamblers to quit have been met with scoffing and jeers.

The gamblers begin to gather, it is said, at ten o'clock or half past, every Sunday morning and they keep it up until the middle of the afternoon.

The prodigal had returned. "Father," he said, "are you going to kill the fattest calf?" "No," responded the Old Man, looking the youth over carefully, "no, I'll let you live. But I'll put you to work and train some of that fat off."—Cleveland Leader.

MRS. A. M. HAGERMANN

## Lydia E. Pinkham's Vegetable Compound

made from simple native roots and herbs. For more than thirty years it has been helping women to be strong, regulating the functions perfectly and overcoming pain. It has also proved itself invaluable in preparing for child birth and the Change of Life.

Mrs. A. M. Hagermann, of Bay Shore, L. I., writes:—Dear Mrs. Pinkham:—I suffered from a displacement, excessive and painful functions so that I had to lie down or sit still most of the time. Lydia E. Pinkham's Vegetable Compound has made me a well woman so that I am able to attend to my duties. I wish every suffering woman would try Lydia E. Pinkham's Vegetable Compound and see what relief it will give them.

### Mrs. Pinkham's Standing Invitation to Women

Women suffering from any form of female illness are invited to write Mrs. Pinkham, at Lynn, Mass. for advice. She is the Mrs. Pinkham who has been advising sick women free of charge for more than twenty years, and before that she assisted her mother-in-law Lydia E. Pinkham in advising. Therefore she is especially well qualified to guide sick women back to health.

## ALL WOMEN SUFFER

from the same physical disturbances, and the nature of their duties, in many cases, quickly drift them into the horrors of all kinds of female complaints, organic troubles, ulceration, falling and displacements, or perhaps irregularity or suppression causing backache, nervousness, irritability, and sleeplessness.

Women everywhere should remember that the medicine that holds the record for the largest number of actual cures of female ills is
